

After reviewing the pertinent points of the proposal RM-10870 I feel that the main point of the proposal, which is eliminating CW, does clearly represent the consensus of the vast majority of Amateur Radio operators. While RM-10870 is similar to Proposal RM-10867, I feel that RM-10867 is a compromise that could be accepted by all. Therefore I urge the Federal Communications Commission to view RM-10870 as another indicator that the elimination of the code, re-farming of the band plans and straightening out the licensing classes are the right way to go and adopt the proposal as put forth in RM-10867 in a timely manner.
